

## ULTIMATE PITCH DIMENSIONS

The playing field is a rectangle area with dimensions and zones as shown on diagram

The perimeter lines surround the playing field and consist of two (2) sidelines along the length and two (2) endlines along the width.

The brick mark is the intersection of two (2) crossed one (1) metre lines in the central zone set eighteen (18) metres from each goal line, midway between the sidelines.

The field should be flat and free of obstacles.

There should be a run-off space of approx 5m in all directions around the field. Under some circumstances this may be slightly reduced, but this depends on the details of the situation and should be verified with the tournament-organiser.
